

**Project Design Phase-II**  
**Solution Requirements (Functional & Non-functional)**

Date	27 October 2022
Team ID	PNT2022TMID13985
Project Name	Project – Industry-Specific Fire Management System
Maximum Marks	4 Marks

**Functional Requirements:**

Following are the functional requirements of the proposed solution.

FR No.	Functional Requirement (Epic)	Sub Requirement (Story / Sub-Task)
FR-1	<b>User Requirements</b>	Workers and Product Protection Automatic Sprinkler System Monitors Smoke ,Gas and Temperature
FR-2	<b>User Registration</b>	Manual Registration Registration through webpage Registration through Form Registration through Gmail
FR-3	<b>User Confirmation</b>	Confirmation via Phone Confirmation via Email Confirmation via OTP
FR-4	<b>Payment Options</b>	Cash on Delivery Net Banking/UPI Credit/Debit/ATM Card
FR-5	<b>Product Delivery and Installation</b>	Door Step delivery Take away Free Installation and 1 year Warranty
FR-6	<b>Product Feedback</b>	Through Webpage Through Phone calls Through Google forms

## Non-functional Requirements:

Following are the non-functional requirements of the proposed solution.

FR No.	Non-Functional Requirement	Description
NFR-1	<b>Usability</b>	Have a clear and self-explanatory manual. Easier to use. Easily accessible by everyone.
NFR-2	<b>Security</b>	Are inspected monthly by the Fire Alarm Technician. Inspected and tagged by a contractor annually.
NFR-3	<b>Reliability</b>	Hardware requires a regular checking and service ..Software may be updated periodically. Immediate alert is provided in case of any system failure.
NFR-4	<b>Performance</b>	The equipment must have a good user interface It should have a minimal energy requirement It has to save lives of people and things
NFR-5	<b>Availability</b>	All the features will be available when the user requires. It depends on the need of the user and the customization of the user has done.
NFR-6	<b>Scalability</b>	The product has to cover all the space of industry irrespective of the size or area.

## Types of requirements

BABOK, which is a recognized set of business analysis industry standards, offers the following classification of requirements.

### Business requirements

These include high-level statements of goals, objectives, and needs. [Business requirements](#) do not include any details or specific features. They just state the problem and the business objective to be achieved such as

- increased revenue/throughput/customer reach,
- reduced expenses/errors,
- improved customer service, etc.

### Solution requirements

Solution requirements describe specific characteristics that a product must have to meet the needs of the stakeholders and the business itself. They fall into two large groups.

- **Functional requirements** define what a product must do, what its features and functions are.
- **Nonfunctional requirements** describe the general properties of a system. They are also known as *quality attributes*.
